This Recovery and Peace Building Assessment (RPBA) for North-East Nigeria is a collaborative product by the Federal Government of the Republic of Nigeria and the State Governments of Adamawa, Bauchi, Borno, Gombe, Taraba and Yobe. The assessment was prepared with support from the European Union (EU), the United Nations (UN) and the World Bank (WB).

Acknowledging the different mandates of the institutions that supported the assessment (EU, UN and WB) and areas of expertise, the findings, conclusions and recommendations expressed in the RPBA do not necessarily constitute the views or formal recommendations of the EU, UN or WB, nor do they reflect the views of the governing bodies of these institutions or their member states. It is also recognized that due to different mandates not all activities set forth or proposed in the report will be shared by or engaged in by the collaborating institutions, and it is further understood that each institution will carry out or be engaged with any such activities in accordance with its mandate, and operational policies and procedures.

The EU, UN and WB do not guarantee the accuracy of the data included in this work. The boundaries, colours, denominations, and other information shown on any map in this work do not imply any judgment on the part of these partners concerning the legal status of any territory or the endorsement or acceptance of such boundaries.

## PREFACE

# Acknowledgements

The North-East Nigeria Recovery and Peace Building Assessment (RPBA) was undertaken by the Federal Government of the Republic of Nigeria, led by the Office of the Vice President and the State Governments of Adamawa, Bauchi, Borno, Gombe, Taraba and Yobe. The assessment was supported by the European Union (EU), the United Nations (UN), and The World Bank (WB).

The Government of Nigeria Core RPBA Team consisted of Dr. Mariam Masha, Senior Special Assistant to the President on Internally Displaced Persons and Focal Points from the six states, including: Maurice Vunobolki (Adamawa); Mohammed Aminu Ibrahim (Bauchi); Dr. Baba Gana Umara (Borno); Aliyu M. Kamara (Gombe); Jeji Williams (Taraba); and Muhammad Yusufari (Yobe).

The strong support and the contributions of the many different national stakeholders was remarkable. The dedication of the RPBA teams from the Federal and State Governments and three institutions was exceptional. Special thanks go to the Federal and State Governments, the EU, UN and WB, and the United Kingdom's Department for International Development (DFID) for financial support provided for this assessment. In addition thanks to the EU for funding the design and layout of this document. The efforts of all made this report possible.

The design and layout of this document was created and executed by the team at Bivee Inc.

## 1.1 Overview

### 1.1.1 Key Facts

TABLE 1  
Adamawa at a glance

State	Adamawa
Capital	Yola
Area	36,917 km <sup>2</sup>
Predominant languages	Hausa, Fulfude
Population (2006 census)	3,178,950
IDPs (IOM, Dec. 2015)	136,000
Main source(s) of income	Agriculture (80% of population)
Governor	Bindo Jibrilla
Governance	21 LGAs
Internally Generated Revenue (2015)	3.97 billion Naira

### 1.1.2 RPBA Background and Key Findings

The North-East Nigeria Recovery and Peace Building Assessment (RPBA) has been conducted under the leadership of the Government of Nigeria in partnership with the European Union, United Nations, and World Bank. The six states have driven the assessment process. State focal points have guided the coordination of assessment and sector focal points provided detailed data on damages and needs. The data have been used to analyse the factors that induced the crisis, the

TABLE 2  
Summary of needs across the three areas of intervention in Adamawa

Areas of intervention	Estimated cost of interventions	
	US\$ (millions)	Naira (millions)
Peace building, stability, and social cohesion	27.6	5,500
Infrastructure and social services	594.8	118,970
Economic recovery	37.6	7,520
<b>Total</b>	<b>659.9[1]</b>	<b>131,992</b>

[1] Due to rounding, numbers presented in the tables throughout this document may not add up precisely to the total.

current status of the crisis, and the strategies for sustainable stabilisation and recovery. This report contains detailed data and analysis from the data sheets collected and from the RPBA field mission to Adamawa.

The recovery and peace building process requires a holistic approach that promotes peace, stability, and social cohesion by addressing the rehabilitation of infrastructure and social services while confronting underlying macroeconomic issues to overcome the nexus of instability, conflict, and deteriorating development. Lessons from other conflict and crisis contexts highlight that rebuilding trust and cohesion is as essential as the restoration of services and reconstruction, economic revitalisation, and building livelihoods. Based on the guiding principles laid out in the overall *Strategic Recovery and Peace Building Framework*, needs have been identified in the three main areas of intervention: (i) peace building, stability, and social cohesion, (ii) infrastructure and social services, and (iii) economic recovery, totalling US\$ 660 million for Adamawa.

### 1.1.3 Overview and Pre-crisis Conditions

Once part of Gongola State, Adamawa was formally established as a state in 1991. While the seventh largest state in Nigeria and the fifth largest in the North-East by area, Adamawa comprised just 0.43 percent of national GDP in 2009.<sup>1</sup> Adamawa's economy remains diversified across livestock (37.1 percent of state GDP), real estate (23.0 percent), crop production (16.6 percent), road transportation (6.8 percent), and wholesale and retail trade (6.6 percent). Adamawa has a strong agricultural base, mineral deposits, fresh water resources, and energy sources.

### 1.1.4 Impact of the Crisis

The conflict in North-East Nigeria has had a deep impact on the region. An estimated 20,000 lives have been lost, and nearly two million people have been forcibly displaced. The human, social, and economic losses of the conflict, and the investments for the recovery, peace building, and reconstruction of the North-East, are overwhelming. The sections below summarise the state-level findings of the RPBA in terms of the damages and resulting needs of Adamawa State for peace building, stability, and social cohesion, infrastructure and social services as well as economic recovery.

## 1.2 Peace Building, Stability, and Social Cohesion

Restoring and enhancing peace, stability, and social cohesion constitutes the backbone of overall recovery efforts, and builds the foundation for the effective and smooth implementation of all programme interventions. The objective of this area of intervention is to assess and then address impacts of the conflict on the social fabric, as well as on local governance and provision of justice, with particular attention to the effects on IDPs and host communities. Effective responses to these challenges will provide the social and political environment for sustainable recovery and longer-term development. The relevant line ministries worked with RPBA partners to provide detailed assessment data on the cost of recovery needs.

### 1.2.1 Needs for Peace Building, Stability, and Social Cohesion

The total needs for promoting peace building, stability, and social cohesion in Adamawa State are estimated at around US\$ 27.5 million. As a state directly impacted by conflict and displacement, social needs in Adamawa are greatest in the subcomponents of ‘local governance and citizen engagement’, and ‘safe and voluntarily return and resettlement of displaced persons’, at US\$ 9.3 million and US\$ 9.0 million, respectively. It is important to note that basic humanitarian needs for the safe and voluntary return and resettlement of displaced persons, such as housing, service delivery, and livelihood support are accounted for in the other areas of intervention. The peace building and social cohesion needs not accounted for in other areas of intervention relate to the restitution of the social tissue, reconciliation, and peace building, restoration of a sense of normalcy and needs of particularly vulnerable sub-groups of IDPs. Addressing the needs in a holistic and integrated manner is critical for sustainable recovery – certainly in Adamawa State – and is seen as a precondition for stability and key for sustainable recovery. Many issues addressed in peace building, stability, and social cohesion — and the recommended interventions — are preconditions of future stability and important efforts to overcome Adamawa’s long-term development challenges.

#### BOX 1.1

### Impact of the Crisis on Adamawa

Adamawa has been directly impacted by the Boko Haram crisis, both in terms of attacks and displacement. The impact on infrastructure and social services has been significant (US\$ 829 million), representing nine percent of the total damages in the six North-East states. Agriculture has been particularly hard hit (55 percent of total damages).

The conflict has also resulted in 136,000 Internally Displaced Persons (IDPs), 94 percent of whom live in host communities. The influx has put significant strain on the state economy, service delivery, and the social fabric.

Given the fluidity of the security environment, careful and coordinated sequencing of the RBPA and subsequent support will be critical to the recovery and peace building process in Adamawa.

TABLE 3

### Estimated needs for peace building, stability and social cohesion in Adamawa

Sector	Needs cost	
	US\$ (millions)	Naira (millions)
Safe and voluntary return and resettlement of displaced persons	9	1,800
Reconciliation, peace building, and community cohesion	3.7	740
Local governance and citizens engagement	9.3	1,860
Community security, justice, human rights, mine action and small arms control	5.6	1,120
<b>Total</b>	<b>27.6</b>	<b>5,520</b>

## 1.3 Infrastructure and Social Services

The sustainable restoration and improvement of infrastructure and social services is crucial to societal normalisation and stabilisation in the crisis-affected areas, as well as for creating conditions for eventual IDPs returns or smooth integration into host communities. The relevant line ministries provided detailed assessment data on the cost of damage attributable to the conflict. The key objectives of this assessment were to (i) characterise and estimate the impacts of the crisis on the physical infrastructure and social services; and (ii) identify needs for the restoration and recovery of infrastructure and service delivery.

### 1.3.1 Impacts and Damages Related to Infrastructure and Social Services

The overall impact of the conflict on infrastructure and social services is estimated at nearly US\$ 829 million. Agriculture accounts for the largest share (55 percent) of the damages at US\$ 458 million. The table below provides a detailed overview. In addition to these damages which can be directly related to Adamawa, the ICT sector across the six states suffered damages of US\$ 25 million, while the commerce sector was impacted by a loss of US\$ 915 million across the six states.

### 1.3.2 Infrastructure and Social Service Needs

The total recovery needs for the infrastructure and social service interventions are estimated at US\$ 595 million. The highest needs arise from agriculture (US\$ 141 million), followed by social protection (US\$ 94 million), education (US\$ 83 million), and transport (US\$ 75 million). In addition, it is estimated that the ICT sector requires recovery interventions of US\$ 272 million across the six states. The table below provides an overview of the needs by sector.

TABLE 4

### Summary of damages to infrastructure and social services in Adamawa

	US\$ (millions)	Naira (millions)
Agriculture	457.8	91,571
Education	57.9	11,595

Water & Sanitation	25.9	5,178
Community Infrastructure Contingency	27.4	5,488
<b>Total</b>	<b>594.9</b>	<b>118,970</b>

## 1.4 Economic Impacts and Recovery Needs

Creating jobs and opportunities to earn a decent living is a critical step to ensure stability, reduce volatility, and protect the social sense of belonging, particularly for members of the affected communities and vulnerable youth. The assessment provides estimated impacts on local macroeconomics (output and price), which has further implications for key sector activities and people's livelihoods and employment. Recovery needs are recommended to restore livelihoods and promote employment to facilitate short-term economic stabilisation as well as to assist the state government to sustain economic recovery in the medium term.

### 1.4.1 Macroeconomic impacts

The crisis has further aggravated the already weak development of Adamawa. It is estimated that Adamawa suffered an accumulated output loss measured by GDP of US\$ 1.57 billion (Naira 314 billion) between 2011 and 2015, while prices rose by more than 10%. The combination of output loss and price increases implies a significant reduction in the welfare of residents in the state (Table 6).

TABLE 6  
Estimated impacts on state output and prices  
2011-2015

State	GDP loss (US\$, millions)	GDP loss (Naira, billions)	Inflation, All items	Inflation, Food
Adamawa	1,570	314	10.4	9

Source: World Bank Staff estimate using the Central Bank of Nigeria data

### 1.4.2 Needs for Economic Recovery and Employment

Recommendations for economic recovery are premised on an understanding that socio-economic recovery in troubled communities is strongly linked to job creation and economic restoration. In view of this, other recommendations for implementing potential interventions include an inclusive, pro-poor approach to economic recovery

TABLE 7  
Estimated needs for economic recovery

Sector	Needs costs	
	US\$ (millions)	Naira (millions)
Livelihood support and local economic recovery	24.2	4,843
Employment	13.4	2,670
Total	37.6	7,513

and tailored proposals for different groups of affected people such as: (i) general population in the North-East; (ii) IDPs; (iii) host communities; (iv) returnees; and (v) vulnerable groups, which include youth, elderly, and women. The specific needs, as identified for the different sub-components, are presented in Table 7. It is estimated that US\$ 245 million is required for reviving the private sector and promoting trade across the six affected states, a substantial amount of which will be required for Adamawa-related interventions. Livelihood support and local economic recovery require US\$ 24.2 million, while the needs for employment schemes, training and support to women, youth, and vulnerable groups add up to US\$ 13.4 million.

## 1.5 Detailed Sector Damages and Needs Tables for Adamawa State

### 1.5.1 Detailed Sector Damages for Adamawa State

	US\$ (millions)	Naira (millions)
<b>Agriculture</b>		
Agriculture mechanisation authority workshop	0.200	46

# Bauchi

## Overview

### 2.1.1 Key Facts

TABLE 8  
Bauchi at a glance

<i>State</i>	<i>Bauchi</i>
Capital	Bauchi
Area	49,119 km <sup>2</sup>
Predominant languages	Hausa
Population (2006 census)	4,653,066
IDPs (IOM Dec. 2015)	70,000
Main source(s) of income	Agriculture (80% of population)
Governor	Mohammed Abdullahi Abubakar
Governance	20 LGAs
Internally Generated Revenue (2015)	4.53 billion Naira

### 2.1.2 RPBA Background and Key Findings

The North-East Nigeria Recovery and Peace Building Assessment (RPBA) was conducted under the leadership of the Government of Nigeria in partnership with the European Union, United Nations and World Bank. The six states have driven the assessment process. State focal points have guided the coordination of assessment and sector focal points have provided detailed data on damage and needs. The data have been used to analyse the factors that induced the crisis, the current status of the crisis, and the strategies for sustainable stabilisation and recovery. This report contains detailed data and analysis from the data sheets collected and from the RPBA field mission to Bauchi.

TABLE 9  
Summary of needs across the three areas of intervention in Bauchi

<i>Areas of intervention</i>	<i>Estimated cost of interventions</i>	
	US\$ (millions)	Naira (millions)
Peace building, stability, and social cohesion	23.9	4,783
Infrastructure and social services	202.9	40,578
Economic recovery	41.4	8,285
<b>Total</b>	<b>268.2</b>	<b>53,646</b>

The recovery and peace building process requires a holistic approach that promotes peace, stability, and social cohesion by addressing the rehabilitation of infrastructure and social services while confronting underlying macroeconomic issues to overcome the nexus of instability, conflict, and deteriorating development. Lessons from other conflict and crisis contexts highlight that rebuilding trust and cohesion is as essential as the restoration of services and reconstruction, economic revitalisation, and building livelihoods. Based on the guiding principles laid out in the overall *Strategic Recovery and Peace Building Framework*, needs have been identified in the three main areas of intervention: (i) peace building, stability, and social cohesion, (ii) infrastructure and social services (iii) economic recovery, totalling US\$ 268 million for Bauchi.

### 2.1.3 Overview and Pre-crisis Conditions

Bauchi was formed in 1976 when the former North-East State was broken up. The former North-East State originally included the area now in Gombe State, which became a distinct state in 1996. Bauchi is the fourth largest state in the country and the third largest in the North-East region, covering a land area of 49,248 square kilometres (19,014 square miles).<sup>2</sup> It is also the most populous State among all six North-East states, with a total population of 4,653,066 people in the 2006 Census.

Agriculture is the mainstay of Bauchi's economy. About 80 percent of the inhabitants in the region engage in the production of food and cash crops, but on small-scale basis. The major crops produced in the state are cotton, maize, groundnuts, millet, guinea corn, rice, beans, sesame seeds, and gum arabic.<sup>3</sup> The state also has deposits of mineral resources, including cassiterite limestone, kaolin, gypsum, antimony, iron ore, gold, marble, columbine, and zinc, but mining activities have also been conducted at small scales. In 2010, the World Bank rated Bauchi State as the 10th best place to do business and the 21st best place to start a business, among all 36 states of Nigeria.<sup>4</sup>

### 2.1.4 Impact of the Crisis

The conflict in North-East Nigeria has had a deep impact on the region. An estimated 20,000 lives have been lost, and nearly two million people have been forcibly displaced. The human, social, and economic losses of the conflict, and the investments for the recovery, peace building, and reconstruction of the North-East, are overwhelming. The sections below summarise the state level findings of the RPBA in terms of the damages and resulting needs for Bauchi State, across peace building, stability, and social cohesion, infrastructure and social services as well as economic recovery.

## 2.2 Peace Building, Stability, and Social Cohesion

Restoring and enhancing peace, stability and social cohesion constitutes the backbone of the overall recovery efforts, and builds the foundation for the effective and smooth implementation of all programme interventions. The objective of this area of intervention is to assess and then address the impacts of conflict on the social fabric and on local governance and provision of justice, with particular attention to the effects on IDPs and host communities. Effective responses to these challenges will provide the social and political environment for sustainable recovery and longer-term development. The relevant line ministries worked with RPBA partners to provide detailed assessment data on the cost of recovery needs.

### 2.2.1 Needs for Peace Building, Stability, and Social Cohesion

The total needs for promoting peace building, stability, and social cohesion in Bauchi State are estimated at around US\$ 23.9 million. Under this component, social needs in Bauchi are greatest in the sub-components of ‘local governance and citizen engagement’ and ‘safe and voluntarily return and resettlement of displaced persons’, at US\$ 8.8 million and US\$ 8.6 million respectively. It is important to note that basic humanitarian needs for the safe and voluntary return/ resettlement of IDPs, such as housing, service delivery, and livelihood support are accounted for in the other areas of intervention. The peace building and social cohesion needs not accounted for in other areas of intervention relate to the restitution of the social tissue, reconciliation, and peace building, restoration of a sense of normalcy and needs of particularly vulnerable sub-groups of IDPs. Addressing the needs in a holistic and integrated manner is critical for sustainable recovery and is seen as a precondition for stability and key for sustainable recovery. Many issues addressed in peace building, stability, and social cohesion — and the recommended interventions — are preconditions of future stability and important efforts to overcome Bauchi’s long-term development challenges.

TABLE 10

### Estimated needs for peace building, stability and social cohesion in Bauchi

Sector	Needs cost	
	US\$ (millions)	Naira (millions)
Safe and voluntary return and resettlement of displaced persons	8.6	1727
Reconciliation, peace building and community cohesion	3.5	695
Local governance and citizens engagement	8.8	1769
Community security, justice, human rights, mine action, small arms control	23	592
<b>Total</b>	<b>23.9</b>	<b>4783</b>

## 2.3 Infrastructure and Social Services

The sustainable restoration and improvement of infrastructure and social services is crucial to societal normalisation and stabilisation in the crisis-affected areas, as well as for creating conditions for eventual IDPs returns or smooth integration into host communities. The relevant line ministries provided detailed assessment data on the cost of damage attributable to the conflict. The key objectives of this assessment were to (i) characterise and estimate the impact of the crisis on the physical infrastructure and social services; and (ii) identify needs for the restoration and recovery of infrastructure and service delivery.

### 2.3.1 Impacts and Damages Related to Infrastructure and Social Services

The overall impact of the conflict on infrastructure and social services is estimated at US\$ 51 million. Health accounts for 55 percent of the damages at \$28 million, with significant impact also noted in the education and agriculture sectors, with \$12 million and \$8 million in damages, respectively. Table 11 provides a detailed overview. In addition to these damages which can be directly related to Bauchi, the ICT sector across the six states suffered damages of US\$ 25 million, while the commerce sector was impacted by a loss of US\$ 915 million across all six states.

### 2.3.2 Infrastructure and Social Service Needs

The total recovery needs for the infrastructure and social service interventions are estimated at US\$ 203 million. The biggest needs arise from social protection (US\$ 91 million), followed by agriculture (US\$ 37 million), and health (US\$ 29 million). In addition, it is estimated that the ICT sector requires recovery interventions of US\$ 272 million across the six states. Table 12 provides an overview of the needs by sector.

TABLE 11

### Summary of damages to infrastructure and social services in Bauchi

	<i>US\$ (millions)</i>	<i>Naira (millions)</i>
Agriculture	7.6	1,513

<b>Total</b>	<b>202.9</b>	<b>40,578</b>

## 2.4 Economic Impacts and Recovery Needs

Creating jobs and opportunities to earn a decent living is a critical step to ensure stability, reduce volatility, and protect the social sense of belonging, particularly for members of the affected communities and vulnerable youth. The assessment provides estimated impacts on local macroeconomics (output and price), which have further implications for key sector activities, livelihoods and employment. Recovery needs are recommended to restore livelihoods and promote employment to facilitate short-term economic stabilisation as well as to assist the state government to sustain economic recovery in the medium term.

### 2.4.1 Macroeconomic Impacts

The crisis has further aggravated the already weak development of Bauchi. It is estimated that Bauchi suffered an accumulated output loss measured by GDP of US\$ 431.5 million (Naira 86.3 billion) between 2011 and 2015. Meanwhile, prices deflated by 4.5 percent for all items, while food prices deflated by 22.6 percent (Table 13).

TABLE 13  
Estimated impacts on state output and prices  
2011-2015

State	GDP loss (US\$, millions)	GDP loss (Naira, billions)	Inflation, All items	Inflation, Food
Bauchi	431.5	86.3	-4.5	-22.6

Source: World Bank Staff estimate using the Central Bank of Nigeria data

### 2.4.2 Needs for Economic Recovery and Employment

Recommendations for economic recovery are premised on an understanding that socio-economic recovery in troubled communities is strongly linked to job creation and economic restoration. In view of this, other recommendations for implementing potential interventions include an inclusive, pro-poor approach to economic recovery and tailored proposals for different groups of affected people such as: (i) general population in the North-East; (ii) IDPs; (iii) host commu-

TABLE 14  
Estimated needs for economic recovery

Sector	Needs costs	
	US\$ (millions)	Naira (millions)
Livelihood support and local economic recovery	23.1	4,612
Employment	18.4	3,672
<b>Total</b>	<b>41.4</b>	<b>8,285</b>

nities; (iv) returnees; and (v) vulnerable groups, which include youth, elderly, and women. The specific needs, as identified for the different subcomponents, are presented in Table 14. It is estimated that US\$ 245 million are required for reviving the private sector and promoting trade across the six affected states, a substantial amount of which will be required for Bauchi-related interventions. Livelihood support and local economic recovery require \$23.1 million, while the needs for employment schemes, training and support to women, youth and vulnerable groups sum up to \$18.4 million.

# Borno

## 3.1 Overview

### 3.1.1 Key Facts

TABLE 15  
Borno at a glance

<i>State</i>	<i>Borno</i>
Capital	Maiduguri
Area	70,898 km <sup>2</sup>
Predominant languages	Kanuri, Ganergu, Wula, Marghi, Mandara, Shuwa, Arabic
Population (2006 census)	4,171,104
IDPs (IOM Dec. 2015)	1,434,149
Main source(s) of income	Agriculture
Governor	Mr. Kashim Shettima
Governance	27 LGAs
Internally Generated Revenue (2015)	9.92 billion Naira

### 3.1.2 RPBA Background and Key Findings

The North-East Nigeria Recovery and Peace Building Assessment (RPBA) was conducted under the leadership of the Government of Nigeria in partnership with the European Union, United Nations, and World Bank. The six states have driven the assessment process. State focal points have guided the coordination of assessment, and sector focal points provided detailed data on damage and needs. The data have been used to analyse the factors that induced the crisis, the current state of the crisis, and the strategies for sustainable stabilisation and recovery. This report contains detailed data and analysis from the data sheets collected and from the RPBA field mission to Borno in February 2016.

TABLE 16  
Summary of needs across the three areas of intervention in Borno

<i>Areas of intervention</i>	<i>Estimated cost of interventions</i>	
	US\$ (millions)	Naira (billions)
Peace building, stability and social cohesion	37.8	7,560
Infrastructure and social services	3,933.3	798,666
Economic recovery	68.8	13,760
<b>Total</b>	<b>4,039.9</b>	<b>807,982</b>

The recovery and peace building process requires a holistic approach that promotes peace, stability, and social cohesion by addressing the rehabilitation of infrastructure and social services while confronting underlying macroeconomic issues to overcome the nexus of instability, conflict, and deteriorating development. Lessons from other conflict and crisis contexts highlight that rebuilding trust and cohesion is as essential as the restoration of services and reconstruction, economic revitalisation, and building livelihoods. This is particularly important for Borno, where the security situation is still fragile in many local government areas (LGAs). Activities will thus be implemented in a phased approach, where stabilisation and recovery activities will be first carried out in those areas that have successfully overcome the conflict.

Based on the guiding principles laid out in the overall *Strategic Recovery and Peace Building Framework*, needs have been identified in the three main areas of intervention: (i) peace building, stability, and social cohesion, (ii) infrastructure and social services; and (iii) economic recovery, totalling more than US\$ 4 billion for Borno.

### 3.1.3 Overview and Pre-crisis Conditions

Borno State, created in 1976, is located in the North-Eastern corner of Nigeria, bordering Niger, Chad, and Northern Cameroon. Its location and proximity to Lake Chad puts Borno at an important crossroad for trade with neighbouring countries and other parts of Nigeria. The economy is largely agrarian, with livestock husbandry, irrigated agriculture, and fishing on Lake Chad dominating the economic activities of the population. Industry is still developing in Borno, which accounts for less than one percent of Nigeria's national industrial output.

### 3.1.4 Impact of the Crisis

The conflict in North-East Nigeria has had a deep impact on the region. An estimated 20,000 lives have been lost, and nearly two million people have been forcibly displaced. The human, social, and economic losses of the conflict, and the investments for the recovery, peace building, and reconstruction of the North-East, are overwhelming. Borno has without question been the state most affected by the conflict. Three quarters of the damages recorded by the assessment were found in Borno (US\$ 6.9 billion), while nearly two-thirds of the needs come from the state that has been the epicentre of the crisis (US\$ 3.9 billion). The sections below summarise the state level findings of the RPBA in terms of the damages and resulting needs for Borno State.

## BOX 3.2

**Impact of the Crisis on Borno**

The epicentre of the Boko Haram conflict, Borno has borne the brunt of the violence that has plagued the North-East in recent years. Borno State has felt the direct impact of Boko Haram attacks – including abduction, displacement, structural damage and social-economic impacts – more than any other state in Nigeria. The displaced population in Borno reached more than 1.4 million people as of 31 December 2015, representing more than three quarters of the total IDP population displaced by the conflict. IDPs make up more than one third of the total population of Borno, putting an extraordinary burden on many host communities and the already deteriorated infrastructure and services. In addition to the IDPs living in host communities, 19 IDPs camps have been set up, hosting nearly 100,000 people. The majority of IDPs are concentrated in Maiduguri, doubling the size of its population in two years.

As the state most affected by conflict and displacement, Borno has disproportionately experienced some of the most drastic impacts in terms of social cohesion and community security. Parts of the state remain in control of Boko Haram, while others recovered by the Armed Forces remain unstable. Terrorist attacks are still frequent, and the prevalence of mines and unexploded ordnance continue to pose a threat to the populace, particularly those trying to return to their farmland. When combined with the widespread damage to both private and public infrastructure, these factors dramatically affect the likelihood, desire and capacity of IDPs to return to their places of origin, even after these areas are secured. The rise of the Civilian Joint Task Forces and vigilante groups as a response to Boko Haram has also increased the level of community insecurity due to the widespread presence of weapons and the fact that some have resorted to crime as a means of livelihoods.

The housing, agricultural and education sectors have been particularly affected. Some 95% of the damage suffered in the housing sector throughout the North-East has occurred in Borno. Many farmers and herders have fled the area and are unable to cultivate their fields, while many areas are unsafe to access due to the presence of landmines. Schools have been used as IDP camps, and many secondary and primary schools have been destroyed. Similarly, many clinics and primary health facilities have been damaged or destroyed, while doctors, nurses and teachers have been killed during the conflict. Major parts of Borno are still not accessible due to continuing insecurity. Given the fluidity of the security environment, careful and coordinated sequencing of the RBPA and subsequent support will be critical to the recovery and peace building process in Borno.

**3.2 Peace Building, Stability, and Social Cohesion**

Restoring and enhancing peace, stability and social cohesion constitutes the backbone of the overall recovery efforts, and builds the foundation for the effective and smooth implementation of all programmatic interventions. The objective of this area of intervention is to assess and then address the impacts of conflict on the social fabric and on local governance and provision of justice, with particular attention to the effects on IDPs and host communities. Effective responses to these challenges will provide the social and political environment for sustainable recovery and longer-term development. The relevant line ministries worked with RPBA partners to provide detailed assessment data on the cost of recovery needs.

**3.2.1 Needs for Peace Building, Stability, and Social Cohesion**

The total needs for promoting peace building, stability, and social cohesion in Borno are estimated at around US\$ 37.8 million. Needs are greatest in the subcomponents of safe and voluntary return and resettlement of displaced persons, and local governance and citizen engagement, at US\$ 11.3 million and US\$ 11.9 million respectively. It is important to note that critical needs for the safe and voluntary return/resettlement of IDPs, such as housing, service delivery, and economic activities, are accounted for in the other areas of intervention. The peace building and social cohesion needs not accounted for in other areas of intervention relate to the restitution of the social tissue, reconciliation, and peace building, restoration of a sense of normalcy and needs of particularly vulnerable subgroups of IDPs. Addressing the needs in a holistic and integrated manner is critical for success – certainly in Borno – and seen as a precondition for stability and key for sustainable recovery. Many issues addressed in peace building, stability, and social cohesion —and the recommended interventions — are preconditions for future stability and important efforts to overcome Borno's long-term development challenges.

TABLE 17

**Estimated needs for peace building, stability, and social cohesion in Borno**

Sector	Needs cost	
	US\$ (millions)	Naira (billions)
Safe and voluntary return and resettlement of displaced persons	11.3	2,264
Reconciliation, peace building and community cohesion	4.7	939
Local governance and citizens engagement	11.9	2,388
Community security, justice, human rights, mine action, small arms control	9.8	1,965
<b>Total</b>	<b>37.8</b>	<b>7,556</b>

### 3.3 Infrastructure and Social Services

The sustainable restoration and improvement of infrastructure and social services is crucial to societal normalisation and stabilisation in the crisis-affected areas, as well as for creating conditions for eventual IDPs returns or smooth integration into host communities. The relevant line ministries provided detailed assessment data on the cost of damage attributable to the conflict. The key objectives of this assessment were to (i) characterise and estimate the impact of the crisis on the physical infrastructure and social services; and (ii) identify needs for the restoration and recovery of infrastructure and service delivery.

#### 3.3.1 Impacts and Damages Related to Infrastructure and Social Services

The impact on the physical infrastructure and related social services can be divided into three broad categories: (i) damages caused by fighting or mining of the areas by all sides of the conflict, (ii) the loss of facilities, and (iii) damages to service provision and supply infrastructure that prevent services from reaching the affected population.

The overall impact of the conflict on infrastructure and social services is estimated at more than US\$ 6.9 billion, accounting for approximately two-thirds of the overall damages across the six states of North-East Nigeria. Private housing accounts for 45 percent of the damages in Borno State, while agriculture accounts for US\$ 2.4 billion of damages, or 34 percent. Table 18 provides a detailed overview. In addition to these damages, which can be directly related to Borno, the ICT sector across the six states suffered US\$ 25 million damages and losses, while the commerce sector was impacted across the six states by a loss of US\$ 915 million.

#### 3.3.2 Infrastructure and Social Services Needs

Need estimations build up to the damages reported to infrastructure to additionally cater to (i) the reconstruction of impacted infrastructure to improve standards, (ii) restoration of service delivery and the replacement of facilities, as well as (iii) the provision of social services to displaced individuals. The needs are prioritised according to the principles laid out in the recovery and peace building strategy. The key objective of ensuring the equitable delivery of infrastructure and social services in conflict-affected areas has been incorporated in various sector needs assessments.

TABLE 18

#### Summary of damages to infrastructure and social services in Borno

	US\$ (millions)	Naira (millions)
Agriculture	2,377.7	475,546
Education	143.8	28,760
Energy	16.0	3,207
Environment	2.9	579
Health	59.0	11,799
Private housing	3,179.0	635,800
Public buildings	15.3	3,053
Transport	306.1	61,228
Water & sanitation	35.0	7,004
Private enterprise	763.6	152,729
<b>Total</b>	<b>6,898.5</b>	<b>1,379,706</b>

TABLE 19

#### Estimated needs by sector, infrastructure and social services in Borno

	US\$ (millions)	Naira (millions)
Agriculture	485.4	97,089
Education	513.6	102,721
Energy	15.9	3,188
Environment	235.9	47,183
Health	481.7	96,338
Private housing	1,097.4	219,475
Public buildings	295.9	59,170
Social protection	180.2	36,053
Transport	337.5	67,505
Water & sanitation	115.3	23,065
Community Infrastructure Contingency	174.4	34,880
<b>Total</b>	<b>3,933.3</b>	<b>798,666</b>

The total recovery needs for the infrastructure and social service interventions are estimated at US\$ 3.9 billion. The highest needs arise for the reconstruction of houses (US\$ 1.1 billion), followed by education (US\$ 513 million), agriculture (US\$ 485 million), and health (US\$ 482 million). Needs for the three infrastructure sectors (transport, energy, water) add up to nearly US\$ 469 million. In addition, it is estimated that the ICT sector requires recovery interventions of US\$ 272 million across the six states. Table 19 provides an overview of the needs by sector.

### 3.4 Economic Impacts and Recovery Needs

Creating jobs and opportunities to earn a decent living is a critical step to ensure stability, reduce volatility, and protect the social sense of belonging, particularly for members of the affected communities and vulnerable youth. The assessment provides estimated impacts on local macroeconomics (output and price), which have further implications for key sector activities, livelihoods, and employment. Recovery needs are recommended to restore livelihoods and promote employment to facilitate short-term economic stabilisation as well as to assist the state government to sustain economic recovery in the medium term.

#### 3.4.1 Macroeconomic Impacts

The crisis has further aggravated the already weak development of Borno. It is estimated that Borno suffered an accumulated output loss measured by GDP of US\$ 3.54 billion (Naira 708 billion) between 2011 and 2015, while prices rose by slightly more than 10 percent. The combination of output loss and price increases implies a significant reduction in the welfare of residents in the state (Table 20).

TABLE 20

#### Estimated impacts on state output and prices 2011-2015

State	GDP loss (US\$, millions)	GDP loss (Naira, billions)	Inflation, All items	Inflation, Food
Borno	3,541	708.2	10	11.3

Source: World Bank Staff estimate using the Central Bank of Nigeria data

#### 3.4.2 Needs for Economic Recovery and Employment

Recommendations for economic recovery are premised on an understanding that socio-economic recovery in troubled communities is strongly linked to job creation and economic restoration. In view of this, other recommendations for implementing potential interventions include an inclusive, pro-poor approach to economic recovery and tailored proposals for different groups of affected people such as:

TABLE 21

#### Estimated impacts on state output and prices 2011-2015

Sector	Needs costs	
	US\$ (millions)	Naira (billions)
Livelihood support and local economic recovery	31.1	6,220
Employment	37.7	7,540
<b>Total</b>	<b>68.8</b>	<b>13,760</b>

(i) general population in the North-East; (ii) IDPs; (iii) host communities; (iv) returnees; and (v) vulnerable groups, which include youth, elderly, and women. The specific needs, as identified for the different sub components, are presented in Table 21. It is estimated that US\$ 245 million is required for reviving the private sector and promoting trade across the six affected states, a substantial amount of which will be required for Borno-related interventions. Livelihood support and local economic recovery require US\$ 31.1 million, while the needs for employment schemes, training and support to women, youth, and vulnerable groups sum up to US\$ 37.7 million.

## 3.5 Detailed Sector Damages and Needs Tables for Borno State

## Gombe

## 4.1 Overview

### 4.1.1 Key Facts

TABLE 22  
Gombe at a glance

State	Gombe
Capital	Gombe
Area	20,265 km <sup>2</sup>
Predominant languages	Hausa, Igbo, Yoruba
Population (2006 census)	2,353,000
IDPs (IOM Dec. 2015)	25,000
Main source of income	Agriculture (80% of population)
Governor	Ibrahim Hassan Dankwambo
Governance	11 LGAs
Internally Generated Revenue (2015)	4.45 billion Naira

### 4.1.2 RPBA Background and Key Findings

The North-East Nigeria Recovery and Peace Building Assessment (RPBA) was conducted under the leadership of the Government of Nigeria in partnership with the European Union, United Nations, and World Bank. The six states have driven the assessment process. State focal points have guided the coordination of assessment and sector focal points provided detailed data on damage and needs. The data have been used to analyse the factors that induced the crisis, the current status of the crisis, and the strategies for sustainable stabilisation and recovery. This report contains detailed data and analysis from the data sheets collected and from the RPBA field mission to Gombe.

TABLE 23  
Summary of needs across the areas of intervention in Gombe

Areas of intervention	Estimated cost of intervention	
	US\$ (millions)	Naira (millions)
Peace building and social cohesion	13.6	2,725
Infrastructure and social services	129.1	25,810
Economic recovery	22.3	4,452
<b>Total</b>	<b>164.9</b>	<b>32,987</b>

The recovery and peace building process requires a holistic approach that promotes peace, stability, and social cohesion by addressing the rehabilitation of infrastructure and social services while confronting underlying macroeconomic issues to overcome the nexus of instability, conflict, and deteriorating development. Lessons from other conflict and crisis contexts highlight that rebuilding trust and cohesion is as essential as the restoration of services and reconstruction, economic revitalisation, and building livelihoods. Based on the guiding principles laid out in the overall *Strategic Recovery and Peace Building Framework*, needs have been identified in the three main areas of intervention: (i) peace building, stability, and social cohesion, (ii) infrastructure and social services; and (iii) economic recovery, totalling nearly US\$ 165 million for Gombe.

### 4.1.3 Overview and Pre-crisis Conditions

Gombe State was created from the former Bauchi State on 1 October 1996. Covering a land area of 20,265 square kilometres, it is the smallest among the six North-East states.<sup>5</sup> Gombe is predominantly rural with several towns and small urban areas, the most important of which is Gombe, the state capital, which serves as the state's trading and commercial centre. Gombe is divided into 11 LGAs.

Agriculture is the major sector of the economy with crop production and livestock contributing to 65 percent of the total state GDP in 2008.<sup>6</sup> About 80 percent of the total population are peasant farmers involved in the cultivation of food and cash crops, such as millet, sorghum, maize, vegetable, cotton, and groundnut, with or without irrigation. Gombe State also has deposits of solid minerals, including limestone, gypsum, kaolin, silica, talc, uranium and dolomite, but the mining industry contributes relatively little to economic output.

The private sector lacks diversification and is among the development challenges faced by Gombe State.<sup>7</sup> It is dominated by informal sector activities such as petty trading, transportation, local arts and crafts, subsistence farming, and small-scale animal production.

### 4.1.4 Impact of the Crisis

The conflict in North-East Nigeria has had a deep impact on the region. An estimated 20,000 lives have been lost, and nearly two million people have been forcibly displaced. The human, social and economic losses of the conflict, and the investments for the recovery, peace building, and reconstruction of the North-East, are overwhelming. The sections below summarise the state level findings of the RPBA in terms of the damages and resulting needs for Gombe State.

## 4.2 Peace Building, Stability, and Social Cohesion

Restoring and enhancing peace, stability and social cohesion constitutes the backbone of the overall recovery efforts, and builds the foundation for the effective and smooth implementation of all programme interventions. The objective of this area of intervention is to assess and then address the impacts of conflict on the social fabric and on local governance and provision of justice, with particular attention to the effects on IDPs and host communities. Effective responses to these challenges will provide the social and political environment for sustainable recovery and longer-term development. The relevant line ministries worked with RPBA partners to provide detailed assessment data on the cost of recovery needs.

### 4.2.1 Needs for Peace Building, Stability, and Social Cohesion

The total needs for promoting peace building, stability, and social cohesion in Gombe State are estimated at around US\$ 13.6 million. Host to 30,000 IDPs (as of December 2015), Gombe has major social needs to support the ‘safe and voluntarily return and resettlement of displaced persons’, with approximately US\$ 5.2 million as the estimated cost for this subcomponent. It is important to note that basic humanitarian needs for the safe and voluntary return/resettlement of IDPs such as housing, service delivery, and livelihood support are accounted for in the other areas of intervention. The peace building, stability, and social cohesion needs not accounted for in other areas of intervention relate to the restitution of the social tissue, reconciliation, and peace building, restoration of a sense of normalcy and needs of particularly vulnerable sub-groups of IDPs. Addressing the needs in a holistic and integrated manner is critical for sustainable recovery and is seen as a precondition for stability and key for sustainable recovery. Many issues addressed in peace building and social cohesion — and the recommended interventions — are preconditions of future stability and important efforts to overcome Gombe’s long-term development challenges.

TABLE 24  
Estimated needs by sector, infrastructure, and social services in Gombe

<i>Sector</i>	<i>Needs cost</i>	
	US\$ (millions)	Naira (millions)
Safe and voluntary return and resettlement of displaced persons	5.2	1,035
Reconciliation, peace building and community cohesion	1.9	383
Local governance and citizens engagement	4.9	973
Community security, justice, human rights, mine action, small arms control	1.7	334
<b>Total</b>	<b>13.6</b>	<b>2,725</b>

### 4.3 Infrastructure and Social Services

The sustainable restoration and improvement of infrastructure and social services is crucial to societal normalisation and stabilisation in the crisis-affected areas, as well as for creating conditions for eventual IDPs returns or smooth integration into host communities. The relevant line ministries provided detailed assessment data on the cost of damage attributable to the conflict. The key objectives of this assessment were to (i) characterise and estimate the impact of the crisis on the physical infrastructure and social services; and (ii) identify needs for the restoration and recovery of infrastructure and service delivery.

#### 4.3.1 Impacts and Damages Related to Infrastructure and Social Services

The overall impact of the conflict on infrastructure and social services is estimated at US\$ 42.5 million. Transport accounts for 68 percent of the damages with US\$ 29 million, followed by agriculture, which, at US\$ 4.9 million, is a distant second at 11 percent of the total damages. The table below provides a detailed overview. In addition to these damages which can be directly related to Gombe, the ICT sector across the six states suffered damages of US\$ 25 million, while the commerce sector was impacted by a loss of US\$ 915 million across the six states.

#### 4.3.2 Infrastructure and Social Services Needs

The total recovery needs for infrastructure and social service interventions are estimated at US\$ 126 million. The biggest needs arise from transport (US\$ 37 million), followed closely by social protection (US\$ 34 million). In addition, it is estimated that the ICT sector requires recovery interventions of US\$ 272 million across the six states. The table below provides an overview of the needs by sector.

TABLE 25

#### Summary of damages to infrastructure and social services in Gombe

	<i>US\$ (millions)</i>	<i>Naira (millions)</i>
Agriculture	4.9	977
Education	2.1	415
Environment	0.2	38

Water & sanitation	3	591
Community Infrastructure Contingency	5.4	1,070
<b>Total</b>	<b>129.1</b>	<b>25,810</b>

## 4.4 Economic Impacts and Recovery Needs

Creating jobs and opportunities to earn a decent living is a critical step to ensure stability, reduce volatility, and protect the social sense of belonging, particularly for members of the affected communities and vulnerable youth. The assessment provides estimated impacts on local macroeconomics (output and price), which have further implications for key sector activities, livelihoods, and employment. Recovery needs are recommended to restore livelihoods and promote employment to facilitate short-term economic stabilisation as well as to assist the state government to sustain economic recovery in the medium term.

### 4.4.1 Macroeconomic Impacts

The crisis has further aggravated the already weak development of Gombe. It is estimated that Gombe suffered an accumulated output loss measured by GDP of US\$ 1.4 billion (Naira 281 billion) between 2011 and 2015, while prices rose by nearly 13 percent for all items and even by 46 percent for food items. The combination of output loss and price increases implies a significant reduction in the welfare of the residents in the state (Table 27).

TABLE 27

### Estimated impacts on state output and prices 2011-2015

State	GDP loss (US\$, millions)	GDP loss (Naira, billions)	Inflation, All items	Inflation, Food
Gombe	1,404.50	280.9	12.7	46.3

Source: World Bank Staff estimate using the Central Bank of Nigeria data

### 4.4.2 Needs for Economic Recovery and Employment

Recommendations for economic recovery are premised on an understanding that socio-economic recovery in troubled communities is strongly linked to job creation and economic restoration. In view of this, other recommendations for implementing potential interven-

TABLE 28

### Estimated needs for economic recovery

Sector	Needs costs	
	US\$ (millions)	Naira (millions)
Livelihood support and local economic recovery	12.7	2,537

<b>Total</b>	<b>22.3</b>	<b>4,452</b>

tions include an inclusive, pro-poor approach to economic recovery and tailored proposals for different groups of affected people such as: (i) general population in the North-East; (ii) IDPs; (iii) host communities; (iv) returnees; and (v) vulnerable groups, which include youth, elderly, and women. The specific needs, as identified for the different subcomponents, are presented in Table 28. It is estimated that US\$ 245 million are required for reviving the private sector and promoting trade across the six affected states, a substantial amount of which will be required for Gombe-related interventions. Livelihood support and local economic recovery require US\$ 12.7 million, while the needs for employment schemes, training and support to women, youth and vulnerable groups sum up to US\$ 9.6 million.

## 4.5 Detailed Sector Damages and Needs Tables for Gombe State

NATURE'S GIFT TO THE NATION

# Taraba

## 5.1 Overview

### 5.1.1 Key Facts

TABLE 29  
Taraba at a glance

<i>State</i>	<i>Taraba</i>
Capital	Jalingo
Area	56,300 km <sup>2</sup>
Predominant languages	Hausa
Population (2006 census)	2,294,800
IDPs (IOM Dec. 2015)	50,000
Main source(s) of income	Agriculture (80% of population)
Governor	Darius Dickson Ishaku
Governance	16 LGAs
Internally Generated Revenue (2015)	18.59 billion Naira

### 5.1.2 RPBA Background and Key Findings

The North-East Nigeria Recovery and Peace Building Assessment (RPBA) was conducted under the leadership of the Government of Nigeria in partnership with the European Union, United Nations, and World Bank. The six states have driven the assessment process. State focal points have guided the coordination of assessment and sector focal points have provided detailed data on damage and needs. Data collected has been used to analyse the factors that induced the crisis and displacement, the current status of the crisis, the displacement dynamics on the ground, and the strategies for sustainable stabilisation and recovery. This report contains detailed data and analysis

TABLE 30  
Summary of needs across the three areas of intervention in Taraba

<i>Areas of intervention</i>	<i>Estimated cost of interventions</i>	
	US\$ (millions)	Naira (millions)
Peace building, stability, and social cohesion	19.4	3,886
Infrastructure and social services	144.9	28,980
Economic recovery	27.7	5,538
<b>Total</b>	<b>192</b>	<b>38,404</b>

from the data sheets collected and from the RPBA field mission to Taraba.

The recovery and peace building process requires a holistic approach that promotes peace, stability, and social cohesion by addressing the rehabilitation of infrastructure and social services while confronting underlying macroeconomic issues to overcome the nexus of instability, conflict, and deteriorating development. Lessons from other conflict and crisis contexts highlight that rebuilding trust and cohesion is as essential as restoration of services and reconstruction, economic revitalisation, and building livelihoods. Based on the guiding principles laid out in the overall *Strategic Recovery and Peace Building Framework*, needs have been identified in three main areas of intervention: (i) peace building, stability, and social cohesion; (ii) infrastructure and social services; and (iii) economic recovery, totalling US\$ 192 million for Taraba State alone.

### 5.1.3 Overview of the State and Pre-crisis Conditions

Taraba State, with Jalingo as its capital, lies largely within the middle of Nigeria on the Mabilla Plateau. With a landmass of 56,300 square kilometers (21,737 square miles), which represents 6.2 percent of Nigeria's total land area, Taraba is the third largest state in Nigeria and the second largest in the North-East region. It is a largely agricultural state, but also serves as a connector between other states. Prior to the insurgency, Taraba had a population of 2,294,800 as per the 2006 census. In 2010, it had an unemployment rate of 6.8 percent. Income-generating activities in Taraba are mainly associated with agriculture and with some mining. The recent addition of a dam has allowed tea production in the hills to resume.

### 5.1.4 Impact of the Crisis

The conflict in North-East Nigeria has had a deep impact on the region. An estimated 20,000 lives have been lost, and nearly two million people have been forcibly displaced. The human, social, and economic losses of the conflict, and the investments for the recovery, peace building, and reconstruction of the North-East, are overwhelming. The sections below summarise the state level findings of the RPBA in terms of the damages and resulting needs for Taraba State.

## 5.2 Peace Building, Stability, and Social Cohesion

Restoring and enhancing peace, stability, and social cohesion constitutes the backbone of the overall recovery efforts and builds the foundation for the effective and smooth implementation of all programme interventions. The objective of this area of intervention is to assess and then address the impacts of conflict on the social fabric and on local governance and provision of justice, with particular attention to the effects on IDPs and host communities. Effective responses to these challenges will provide the social and political environment for sustainable recovery and longer-term development. The relevant line ministries worked with RPBA partners to provide detailed assessment data on the cost of recovery needs.

### 5.2.1 Needs for Peace Building, Stability, and Social Cohesion

The total needs for promoting peace building, stability, and social cohesion in Taraba State are estimated at around US\$ 19.1 million. Home to 50,000 IDPs, Taraba faces the challenge of facilitating the 'safe and voluntarily return and resettlement of displaced persons, followed by promoting 'local governance and citizen engagement', with approximately US\$ 7.0 million for each of these two subcomponents. It is important to note that basic humanitarian needs for the safe and voluntary return/resettlement of IDPs such as housing, service delivery and livelihood support are accounted for in the other areas of intervention. The peace building and social cohesion needs not accounted for in other areas of intervention relate to the restitution of the social tissue, reconciliation, and peace building, restoration of a sense of normalcy and needs of particularly vulnerable sub-groups of IDPs. Addressing the needs in a holistic and integrated manner is critical for sustainable recovery and is seen as a precondition for stability and key for sustainable recovery. Many issues addressed in peace building, stability, and social cohesion — and the recommended interventions — are preconditions of future stability and important efforts to overcome Taraba's long-term development challenges.

TABLE 31

### Estimated needs for peace building, stability and social cohesion in Taraba

Sector	Estimated Needs Cost	
	US\$ (millions)	Naira (millions)
Safe and voluntary return and resettlement of displaced persons	7.1	1,419
Reconciliation, peace building, and community cohesion	2.8	556
Local governance and citizen engagement	7.1	1,415
Community security, justice, human rights, mine action, small arms control	2.5	495
<b>Total</b>	<b>19.4</b>	<b>3,886</b>

## 5.3 Infrastructure and Social Services

The sustainable restoration and improvement of infrastructure and social services is crucial to societal normalisation and stabilisation in the crisis-affected areas, as well as for creating conditions for eventual IDP returns or smooth integration into host communities. The relevant line ministries provided detailed assessment data on the cost of damage attributable to the conflict. The key objectives of this assessment were to (i) characterise and estimate the impact of the crisis on the physical infrastructure and social services; and (ii) identify needs for the restoration and recovery of infrastructure and service delivery.

### 5.3.1 Impacts and Damages Related to Infrastructure and Social Services

The overall impact of the conflict on infrastructure and social services is estimated at US\$ 41 million. Agriculture accounts for 29 percent of the damages with a loss of US\$ 12 million, followed closely by education, which, at US\$ 10.2 million, accounts for 25 percent of the total damages. Significant impact is also noted in the energy sector with US\$ 7 million or 17 percent of the total damages. The table below provides a detailed overview. In addition to these damages, which can be directly related to Taraba, the ICT sector across the six states suffered damages of US\$ 25 million, while the commerce sector was impacted by a loss of US\$ 915 million across the six states.

### 5.3.2 Infrastructure and Social Services Needs

The total recovery needs for infrastructure and social service interventions are estimated at US\$ 145 million. The biggest needs arise from environment sector (US\$ 34 million), followed by social protection (US\$ 30.5 million), and agriculture (US\$ 29.7 million). In addition, it is estimated that the ICT sector requires recovery interventions of US\$ 272 million across the six states. The table below provides an overview of the needs by sector.

TABLE 32

### Summary of damages to infrastructure and social services in Taraba

	<i>US\$ (millions)</i>	<i>Naira (millions)</i>
Agriculture	11.9	2,394
Education	10.2	2,044
Energy	7	1,398
Environment	0.8	167
Health	6.5	1,295
Private Housing	2.8	550
Public Buildings	2.1	417
<b>Total</b>	<b>41.3</b>	<b>8,266</b>

TABLE 33

### Infrastructure and social services: estimated needs by sector in Taraba

	<i>US\$ (millions)</i>	<i>Naira (millions)</i>
Agriculture	29.7	5,940
Education	17.4	3,474
Energy	3.4	678
Environment	34.4	6,873

Social protection	30.6	6,111
Water & sanitation	4.7	937
Community Infrastructure Contingency	4.1	812
<b>Total</b>	<b>144.8</b>	<b>28,980</b>

## 5.4 Economic Impacts and Recovery Needs

Creating jobs and opportunities to earn a decent living is a critical step to ensure stability, reduce volatility, and protect the social sense of belonging, particularly for members of the affected communities and vulnerable youth. The assessment provides estimated impacts on local macroeconomics (output and price), which have further implications for key sector activities, livelihoods, and employment. Recovery needs are recommended to restore livelihoods and promote employment to facilitate short-term economic stabilisation as well as to assist the state government to sustain economic recovery in the medium term.

### 5.4.1 Macroeconomic Impacts

The crisis has further aggravated the already weak development of Taraba. It is estimated that Taraba suffered an accumulated output loss measured by GDP by US\$ 245.5 million (Naira 49 billion) between 2011 and 2015. Prices deflated by three percent for all items, while food prices remained unchanged (Table 34).

TABLE 34  
Estimated impacts on state output and prices, 2011-2015

State	GDP loss (US\$, millions)	GDP loss (Naira, billions)	Inflation, All items	Inflation, Food
Taraba	245.5	49.1	-2.9	0

Source: World Bank Staff estimate using the Central Bank of Nigeria data

TABLE 35  
Estimated needs by sector for economic recovery

Sector	Estimated Needs Cost	
	US\$ (millions)	Naira (millions)
Livelihood support and local economic recovery	18.4	3,690
Employment	9.2	1,848
<b>Total</b>	<b>27.7</b>	<b>5,538</b>

### 5.4.2 Needs for Economic Recovery and Employment

Recommendations for economic recovery are premised on an understanding that socio-economic recovery in troubled communities is strongly linked to job creation and economic restoration. In view of this, other recommendations for implementing potential interventions include an inclusive, pro-poor approach to economic recovery and tailored proposals for different groups of affected people such as: (i) general population in the North-East; (ii) IDPs; (iii) host communities; (iv) returnees; and (v) vulnerable groups, which include youth, elderly and women. The specific needs, as identified for the different subcomponents, are presented in Table 35. It is estimated that US\$ 245 million are required for reviving the private sector and promoting trade across the six affected states, a substantial amount of which will be required for Taraba-related interventions. Livelihood support and local economic recovery require US\$ 18.4 million, while the needs for employment schemes, training and support to women, youth and vulnerable groups sum up to US\$ 9.2 million.

## 5.5 Detailed Sector Damages and Needs Tables for Taraba State

# PRIDE OF THE SAHEL

## Yobe

## 6.1 Overview

### 6.1.1 Key Facts

TABLE 36  
Yobe at a glance

State	Yobe
Capital	Damaturu
Area	45,502 km <sup>2</sup>
Predominant languages	Kanuri
Population (2006 census)	2,321,339
IDPs (IOM Dec. 2015)	131,000
Main source(s) of income	Agriculture and fisheries (80% of population)
Governor	Ibrahim Geidam
Governance	17 LGAs
Internally generated revenue (2015)	1.8 billion Naira

### 6.1.2 RPBA background and key findings

The North-East Nigeria Recovery and Peace Building Assessment (RPBA) was conducted under the leadership of the Government of Nigeria in partnership with the European Union, United Nations, and World Bank. The six states have driven the assessment process. State focal points have guided the coordination of assessment and sector focal points have provided detailed data on damage and needs. The data have been used to analyse the factors that induced the crisis, the current status of the crisis, and the strategies for sustainable stabilisation and recovery. This report contains detailed data and analysis

TABLE 37  
Summary of needs across the three areas of intervention in Yobe

Component	Needs cost	
	US\$ (millions)	Naira (millions)
Peace building, stability, and social cohesion	22.5	4,501
Infrastructure and social services	668.3	133,658
Economic recovery	30.7	6,145
<b>Total</b>	<b>721.5</b>	<b>144,305</b>

from the data sheets collected and from the RPBA field mission to Yobe.

The recovery and peace building process requires a holistic approach that promotes peace, stability, and social cohesion by addressing the rehabilitation of infrastructure and social services while confronting underlying macroeconomic issues to overcome the nexus of instability, conflict, and deteriorating development. Lessons from other conflict and crisis contexts highlight that rebuilding trust and cohesion is as essential as restoration of services and reconstruction, economic revitalisation, and building livelihoods. Based on the guiding principles laid out in the overall *Strategic Recovery and Peace Building Framework*, needs have been identified in the three main areas of intervention: (i) peace building, stability, and social cohesion; (ii) infrastructure and social services; and (iii) economic recovery, totalling more than US\$ 722 million for Yobe.

### 6.1.3 Overview and Pre-crisis Conditions

Yobe State was carved out of Borno State on 27 August 1991. It borders Bauchi, Borno, Gombe, and Jigawa, while to the north it borders the Republic of Niger. The state covers a land area of 45,502 square kilometers. Yobe is primarily a rural state. The majority of the population live in rural settlements while the rest live in five urban centres. Before the insurgency, Yobe's economy was agricultural-based, comprised mostly of livestock, crop, horticultural production and fisheries, gum arabic and palm trees. The state traded with neighbouring states and countries, mainly by road. It had a burgeoning tourism economy with a number of hotels and restaurants catering to people visiting the local bird sanctuary and parks.

### 6.1.4 Impact of the Crisis

The conflict in North-East Nigeria has had a deep impact on the region. An estimated 20,000 lives have been lost, and nearly two million people have been forcibly displaced. The human, social, and economic losses of the conflict, and the investments for the recovery, peace building, and reconstruction of the North-East, are overwhelming. The sections below summarise the state level findings of the RPBA in terms of the damages and resulting needs for Yobe State.

## 6.2 Peace Building, Stability and Social Cohesion

Restoring and enhancing peace, stability, and social cohesion constitutes the backbone of the overall recovery efforts, and builds the foundation for the effective and smooth implementation of all programme interventions. The objective of this area of intervention is to assess and then address the impacts of conflict on the social fabric and on local governance and provision of justice, with particular attention to the effects on IDPs and host communities. Effective responses to these challenges will provide the social and political environment for sustainable recovery and longer-term development. The relevant line ministries worked with RPBA partners to provide detailed assessment data on the cost of recovery needs.

### 6.2.1 Needs for Peace Building, Stability and Social Cohesion

The total needs for promoting peace building, stability, and social cohesion in Yobe are estimated at around US\$ 22.5 million. As a state directly impacted by conflict and displacement, social needs in Yobe are greatest in the subcomponents of ‘local governance and citizen engagement, and ‘safe and voluntarily return and resettlement of displaced persons’, with approximately US\$ 7.5 million for each of these two subcomponents. It is important to note that basic humanitarian needs for the safe and voluntary return/resettlement of IDPs, such as housing, service delivery, and livelihood support, are accounted for in the other areas of intervention. The peace building and social cohesion needs not accounted for in other areas of intervention relate to the restitution of the social tissue, reconciliation, and peace building, restoration of a sense of normalcy and needs of particularly vulnerable sub-groups of IDPs. While estimated costs for the subcomponent on ‘community security, justice, human-rights, mine action and small arms control’ are comparatively low among the six North-East states, it is essential in terms of ensuring the safe implementation of all programme interventions. Addressing the needs in a holistic and integrated manner is critical for sustainable recovery – certainly in Yobe State – and is seen as a precondition for stability and key for sustainable recovery. Many issues addressed in peace building, stability, and social cohesion — and the recommended interventions — are preconditions of future stability and important efforts to overcome Yobe’s long-term development challenges.

TABLE 38

### Estimated needs for peace building, stability and social cohesion in Yobe

Sector	Needs cost	
	US\$ (millions)	Naira (millions)
Safe and voluntary return and resettlement of displaced persons	7.5	1,496
Reconciliation, peace building and community cohesion	3	591
Local governance and citizens engagement	7.5	1,503
Community security, justice, human rights, mine action, small arms control	4.6	910
<b>Total</b>	<b>22.5</b>	<b>4,501</b>

#### BOX 6.3

### Impact of the Crisis on Yobe

After Borno, Yobe has been the state most affected by the Boko Haram crisis, both in terms of conflict and the population displacement caused by the conflict. The RPBA found that Yobe has sustained 13 percent of all infrastructure and social service damages in the North-East (US\$ 1.2 billion). The agricultural sector has been hardest hit, representing 72 percent of total damages in the state.

Yobe hosts more than 131,000 IDPs, 40 percent from Yobe, and 57 percent from Borno. Nearly 94 percent of IDPs live in host communities (IOM, Dec. 2015). The influx has put significant strain on the state economy, service delivery, and the social fabric.

Given the fluidity of the security environment, careful and coordinated sequencing of the RBPA and subsequent support will be critical to the recovery and peace building process in Yobe.

## 6.3 Infrastructure and Social Services

The sustainable restoration and improvement of infrastructure and social services is crucial to societal normalisation and stabilisation in the crisis-affected areas, as well as for creating conditions for eventual IDPs returns or smooth integration into host communities. The relevant line ministries provided detailed assessment data on the cost of damage attributable to the conflict. The key objectives of this assessment were to (i) characterise and estimate the impact of the crisis on the physical infrastructure and social services; and (ii) identify needs for the restoration and recovery of infrastructure and service delivery.

### 6.3.1 Impacts and Damages Related to Infrastructure and Social Services

The overall impact of the conflict on infrastructure and social services is estimated at US\$ 1.2 billion. Agriculture accounts for 72 percent of the damages (US\$ 868.7 million), followed by private housing (US\$ 118 million) and transport (US\$ 117 million), at 10 percent each, accounting for the majority of the remaining damages. Table 39 provides a detailed overview. In addition to these damages - which can be directly related to Yobe - the ICT sector across the six states suffered damages of US\$ 25 million, while the commerce sector was impacted by a loss of US\$ 915 million across all six states.

### 6.3.2 Infrastructure and Social Service Needs

The total recovery needs for infrastructure and social service interventions are estimated at US\$ 668 million. The biggest needs arise from agriculture (US\$ 170 million), and transport (US\$ 127 million). In addition, it is estimated that the ICT sector requires recovery interventions of US\$ 272 million across the six states. Table 40 provides an overview of the needs by sector.

TABLE 39

### Summary of damages to infrastructure and social services in Yobe

	<i>US\$ (millions)</i>	<i>Naira (millions)</i>
Agriculture	868.7	173,744
Education	47.3	9,466

Total	668.3	133,658

## 6.4 Economic Impacts and Recovery Needs

Creating jobs and opportunities to earn a decent living is a critical step to ensure stability, reduce volatility, and protect the social sense of belonging, particularly for members of the affected communities and vulnerable youth. The assessment provides estimated impacts on local macroeconomics (output and price), which have further implications for key sector activities, livelihoods, and employment. Recovery needs are recommended to restore livelihoods and promote employment to facilitate short-term economic stabilisation as well as to assist the state government to sustain economic recovery in the medium term.

### 6.4.1 Macroeconomic Impacts

The crisis has further aggravated the already weak development of Yobe. It is estimated that Yobe suffered an accumulated output loss measured by GDP by US\$ 1.1 billion (Naira 222 billion) between 2011 and 2015, while prices rose by nearly 7 percent. The combination of output loss and price increases implies a significant reduction in the welfare of residents in the state (see table 41).

TABLE 41  
Estimated impacts on state output and prices, 2011-2015

State	GDP loss (US\$, millions)	GDP loss (Naira, billions)	Inflation, All items	Inflation, Food
Yobe	1,111.5	222.3	6.6	0.7

Source: World Bank Staff estimate using the Central Bank of Nigeria data

### 6.4.2 Needs for Economic Recovery and Employment

Recommendations for economic recovery are premised on an understanding that socio-economic recovery in troubled communities is strongly linked to job creation and economic restoration. In view of this, other recommendations for implementing potential interventions include an inclusive, pro-poor approach to economic recovery

TABLE 42  
Estimated needs for economic recovery

Sector	Needs costs	
	US\$ (millions)	Naira (millions)
Livelihood support and local economic recovery	19.6	3,921
Employment	11.1	2,224
<b>Total</b>	<b>30.7</b>	<b>6,145</b>

and tailored proposals for different groups of affected people such as: (i) general population in the North-East; (ii) IDPs; (iii) host communities; (iv) returnees; and (v) vulnerable groups, which include youth, elderly, and women. The specific needs, as identified for the different sub components, are presented in Table 42. It is estimated that US\$ 245 million is required for reviving the private sector and promote trade across the six affected states, a substantial amount of which will be required for Yobe-related interventions. Livelihood support and local economic recovery require US\$ 19.6 million, while the needs for employment schemes, training and support to women, youth, and vulnerable groups sum up to US\$ 11.1 million.

## 6.5 Detailed Sector Damages and Needs Tables for Yobe State

### 6.5.1 Detailed Sector Damages for Yobe State

	US\$ (millions)	Naira (millions)
<b>Agriculture</b>		
Peasant farms	295.500	59,097
Gardens	7.600	1,523

*The North-East has suffered tremendously in the past six years. We have all been witness to the destruction of infrastructure, farmlands, businesses and trades, of schools and the loss of school years. Rebuilding, restoring and rehabilitating what has been lost or damaged will cost money and time.*

*...the tasks before us are many and profound but paramount: to fix brick and mortar and to mend hearts and minds damaged by senseless, murderous violence.*

– His Excellency, Professor Yemi Osinbajo, the Vice President of the Federal Republic of Nigeria

### About the Recovery and Peace Building Assessment (RPBA):

On 21 August 2015, the Government of Nigeria requested assistance in assessing the needs associated with peace building and crisis recovery. Support has been provided in accordance with the 2008 Joint European Union (EU) – United Nations (UN) – World Bank (WB) Declaration on crisis assessment and recovery planning. A Recovery and Peace Building Assessment was initiated and findings are presented in this report.

The Recovery and Peace Building Assessment (RPBA) informs a collective vision and strategy on peace building and recovery, and provides a framework for coordinated and coherent support to assist conflict-affected people in the North-East. The assessment covers the six States of Borno, Yobe, Adamawa, Gombe, Taraba, and Bauchi, and provides an overarching framework for stability, peace building, and recovery.

The RPBA is founded on the recognition that a durable resolution to the conflict in the North-East requires addressing the structural and underlying drivers of violent conflict. This understanding has also underpinned the identification and prioritisation of needs presented in this report.
